## GALACTIC SUITE: SOCIALIZING SPACE

*THE POWERING FORCE OF TOURISM*

### 01. GALACTIC SUITE: SOCIALIZING SPACE

Good Afternoon.

It is a **pleasure** to be here. It is an **honor**.

I want to thank the organizers the opportunity they offer us to express **our vision about the space**.

We strongly believe that space is getting **closer to people** by the minute.

We strongly believe in the **powering force of tourism**.

### 02. WHO WE ARE?

We are **space visionaries**.

We are **persons**.

We are architects. We always **work without prejudices**, with **no fear** of entering unknown fields.

We arrived to space knowing very little about rockets, knowing very little about aerospace engineering.

We arrived as **people interested in space** and knowing about **how people want to live**.

Our duty was, and still is, to **make people's** deepest and most unconscious **dreams reality**.

### 03. WHAT ARE WE DOING?

We started proposing a **hotel in space**.

We are still there. But not just.

We immediately realized that a hotel was **just a step**.

But before pointing where this step is driving us to, let me explain the **key issues of Galactic Suite**.

We were used to **design hotels on earth**.

# GALACTIC SUITE

Hotels and tourism, both are related to the idea of **life as a dream**.

A hotel in space needs a longest chain of preparation.

We started to work; we started to gather the suitable team.

We found space enthusiasts and we invited them to join us.

But Galactic Suite is **grounded in more than just technical issues**.

Galactic Suite is **grounded on dreams**, on necessary dreams.

Not just our dream but on people's dreams.

So... We devised and found an island for the Galactic Suite project.

## 04. AND AN ISLAND?

Yes, an island to place training facilities for the space tourist and **their families**.

We want them to **share the experience** with their families.

They will relax in a **natural environment** and enjoy activities such as diving, going to the beach, etc.

But this is not just about amusement.

All dreams are achieved through effort and **challenged realities**.

It is time to get prepared. We will have a **SpacePort** in the island.

## 05. AND A SPACEPORT?

Yes, a SpacePort where space tourist will undertake a 16-week physical and theoretical **training course**.

They will **experience** full-scale Galactic Suite mock-ups and simulators.

They will be **trained** for space environment.

They will be **prepared** to change life on earth through the experience of space.

We wanted a hotel, we found an island, and we devised a preparation process.

Galactic Suite SpacePorts are where the sub-orbital dream has one foot firmly placed on the ground.

The present is already sub-orbital. **The future will be orbital**.

# GALACTIC SUITE

Galactic Suite wants to make space tourism **accessible to the public**.

But now, physical access means a SpaceShip.

## 06. AND A SPACESHIP?

There is technology already developed.

There is technology under development. The suitable SpaceShip is in that area.

Galactic Suite is monitoring the progress of the SpaceCraft manufacturers on their efforts to develop a reusable orbital craft.

How can Galactic Suite **help** the aerospace industry?

We see **tourism empowering the aerospace industry**.

Galactic Suite wants to use the **powering force of tourism**.

Tourism is a better powering source, better than war and the military interest on space.

**Make tourism, not war!**

We want people to enjoy the Galactic Suite SpaceResort. We need them to get it.

## 07. AND A SPACERESORT?

Yes, the hotel developed into a SpaceResort.

The SpaceResort has been conceived as a **refuge orbiting** around Earth.

It will be **inhabited** by alternate visiting crews and passengers.

The space tourist will be in a **protected environment**.

The space tourists will have their **own room**.

They will be allowed to enjoy the **space feelings**.

They will **enjoy** weightlessness.

They will **enjoy** space bath.

They will **enjoy** earth seeing. The experience of viewing the **Earth and stars**.

# GALACTIC SUITE

The SpaceRecort uses the most **glamorous, sensual** materials suitable for space.  
We do not forget that the **space tourist is a person**. And a person has **dreams**.

## 08. A GLOBAL EXPERIENCE!

Galactic Suite started as a hotel in space.

Galactic Suite now is a **global experience about space**.

Galactic Suite involves the space tourists and their families.

But also invites others to enjoy the preparation process.

Galactic Suite is an **experience about people and for people**.

Galactic Suite is bringing the **powering force of tourism** to space industry.

## 09. A TRANSCENDENTAL EXPERIENCE!

Galactic Suite is a fully integrated **space-based tourism concept**.

But Galactic Suite is focused to give people an extremely **emotional experience**.

A transcendental experience.

Orbiting around the world.

Gazing at earth and stars will trigger the space tourist to discover the **uniqueness of our world and existence**.

## 10. WHICH IS OUR GOAL?

Galactic Suite is a **Company** in the emerging **space tourism industry**.

Our goal is to bring space **closer to the people**.

People know that space is there but they believe is **out there**.

We want, **we need**, to make people aware that already **space is part of them**.

**Our aim is to put space in people's heart.**

Galactic Suite is one more step in the direction of **socializing space**.

# GALACTIC SUITE

Galactic Suite is like **an advertisement about space**.

Our final and most important aim is to put space in **people's heart**.

**We work for people.**

## 11. SPACE TO CHANGE LIFE

We are visionaries. We have **a vision**.

We deeply think that the awareness of space is going to **change human life on earth**.

It is **not just about going** to space.

It is about been fully aware of the **potentialities of space**.

## 12. THE BIRTH OF THE *Homo spaciens*

We are not the first to arrive; we will not be the last.

Others had their sayings before.

We envision the birth of the so-called *Homo spaciens*.

The *Homo spaciens* **is already there**, but unaware.

## 13. SOCIALIZING SPACE

By socializing space we mean to bring it closer to people.

As close as **people's heart!**

People need to feel **space as part of them**.

But space needs people to exist.

Tourism, as a dream, as the life desired, is a main actor in people's life.

By socializing space we can use the potentiality of tourism to move people's interests.

We are not alone in that task.

Different initiatives drive to the awareness of the space.

# GALACTIC SUITE

## 14. GS-WWT- GS

Microsoft has the *World Wide Telescope*.

Google has the *Google Sky*.

Galactic Suite will launch a **space tourist lottery** to place in the hotel average people also.

Someone like you, like me. Space is for **normal people**, people **who dream**.

This is our next commitment with people, and with their dreams.

And together we will go further in **socializing space**.

**Thank you very much for your attention.**
